

Exploration Geologist Higginsville Gold Project

Avoca Resources Limited is a mid-tier gold producer having recently constructed its Higginsville Gold Project in Western Australia. Avoca is now producing at 190 – 200Koz per annum from its Trident Underground Gold Mine at Higginsville.

Recent discoveries provide the Company with confidence that the Higginsville Gold Project will become one of Australia's Premier New Generation Gold Mines with a mine life in excess of 10 years.

Avoca Resources will provide you with the opportunity to develop your career and work as part of the experienced Geology team at the Higginsville Gold Operation.

To be considered for this role, you will present the following qualifications and experience:

- Tertiary qualifications in Geology (Honours will be highly regarded)
- Have from 1 to 5 years experience in an Exploration or Mining Geology environment;
- Have a keen and practical interest in understanding mineralisation controls in complex high grade gold deposits.
- Enjoy working as part of a small team, but also able to work independently to finish tasks and projects; and
- Near mine gold exploration experience and computer literacy in geological and mining software will be highly regarded.

This is a site based role and can either be FIFO (from Perth) or DIDO from any of the nearby regional centres on a two week on, one week off roster.

An excellent salary package will be offered relevant to the applicant's background and experience.

To be considered for this role, please forward your CV and a covering letter in confidence to employment@avocaresources.com.au.
